

Repair conditions

1. Only the following codes can be repaired:
 - P0201
 - P0202
 - P0203
 - P0204
 - P0205
 - P0206
2. **Attach the fault codes to the package or write them directly on the ECU.**
Failure to do so will result in the repair being denied.
3. You will only be charged if the repair is successful.
4. We do not accept opened, bent, burnt, water damaged or otherwise damaged ECUs, which failed due to external forces.
5. The turnaround time varies between 1 to 2 weeks.

Warranty conditions

1. The warranty period is one year.
2. Warranty will be voided, if:
 - Airbags deployed
 - ECU/connectors have suffered water damage
 - Broken alternator or electrical shorts
 - Car has caught fire
 - Unit has been opened after the repair
 - Unit has not been properly used (e.g., customer decides to play ball with it)
3. During the warranty period, we will attempt another free repair attempt. If it fails or different non-repairable codes appear, we will get the customer a used replacement unit.
4. On request we can prepare a unit, which the customer can use free of charge until his ECU has returned from repair.

I hereby confirm that I have read and understood the warranty conditions.
